

Free Rife Info CD & 2006 Conference Announcement

Here is some info regarding [Rife technology](#) conference and a great Rife Info CD, courtesy of [Bill Cheb of the plasma tube fame](#). This worthwhile [CD is available here](#) via the Tube Gallery description page for anyone to request free. The CD contains one of Bill's lectures at a previous Rife conference and should give you a little flavour of these conferences. It also contains all manner of great health information and should be of interest to even those not familiar with [Dr.Rife and his work](#) a must get!

Chris Gupta

Greetings.

This is to let you know that the 2006 Rife Conference has been scheduled for October 20-22 in Seattle. Please keep an eye on <http://www.rifeconference.com> for details to be posted soon.

The hotel price has been increased to \$109 per suite so we are going to reduce the conference fees to cover that increase.

[Richard Loyd](#)

A most worthwhile and a must listen lecture by Dr. Loyd's "[One Hundred Years of Effective Cancer Cures- 2 hour talk](#)" from a previous lecture is here. CG
